Hakuji Soyama

Hakuji was born and raised in the slums of Edo (the city we know as Tokyo) to a sickly father he deeply loved. In order to pay for medicine, Hakuji pickpocketed from people in town, but was caught three times. The magistrate beat him and marked him with tattoos, threatening to cut his arms off the

next time he was caught and calling him a "Demon Child". When Hakuji returned home after his third beating, a villager informed him that his father, having heard of his arrest, hung himself. In the letter he left, he stated he wanted Hakuji to live a full life and didn't want to take medicine if it was earned by dishonest means.

With his criminal tattoos

and no home to return to, Hakuji was eventually banished from Edo. Devastated by the loss of his father and enraged at this society they lived in where he couldn't afford his father's medicine, he picked fights with people and beat them up. One day, after nearly killing seven adult men in a village, he was approached by Keizo, the owner of a local dojo. Annoyed by the man's cheerful demeanor, Hakuji challenged him to a fight, but was defeated with ease.

Keizo then took him in so he could nurse Koyu-

TANJIRO KAMADO

Tanjiro Kamado originates from Koyoharu Gotouge's ideas involving a one-shot with Japanese motifs. Tatsuhiko Katayama, their editor, was worried about the one-shot crusade being too dark for the young demographic and asked Gotouge if they could write another type of the main character who would be "brighter". [4] Gotouge has cited issues in the

making of the character due to the contrast he has with the dark narrative. For the release of the manga's seventh chapter, Gotouge drew a cover of Tanjiro wielding his sword while smiling. However, due to the contrasting aesthetics the manga had, they discarded the drawing and

instead drew a similar design with Tanjiro having a serious expression.[5]

In the initial design, Tanjiro did not have a scar or wear earrings, but in the end, they felt these features accentuated the character. In the making of the cast, Tanjiro had four supporting charac-

MOCK UP BANNER

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English. Many desktop publishing packages and web page editors now use Lorem Ipsum as their default model text, and a search for 'lorem ipsum' will uncover many web sites still in their infancy. Various versions have evolved over the years, sometimes by accident, sometimes on purpose (injected humour and the like).

Contrary to popular belief, Lorem Ipsum is not simply random text. It has roots in a piece of classical Latin literature from 45 BC, making it over 2000 years old. Richard McClintock, a Latin professor at Hampden-Sydney College in Virginia, looked up one of the more obscure Latin words, consectetur, from a Lorem Ipsum passage, and going through the cites of the word in classical literature, discovered the undoubtable source. Lorem Ipsum comes from sections 1.10.32 and 1.10.33 of "de Finibus Bonorum et Malorum" (The Extremes of Good and Evil) by Cicero, written in 45 BC. This book is a treatise on the theory of ethics, very popular during the Renaissance. The first line of Lorem Ipsum, "Lorem ipsum dolor sit amet..", comes from a line in section 1.10.32.

WEB PAGE

A web page or webpage is a document, commonly written in HTML, that is viewed in an Internet browser. A web page can be accessed by entering a URL address into a browser's address bar. A web page may contain text, graphics, and hyperlinks to other web pages and files.

A web page provide information to viewers, including pictures or videos to help illustrate important topics. A web page may also be used as a method to sell products or services to viewers. Multiple web pages make up a website, like our Computer Hope website.

When you click a link provided by a search engine, you are accessing a web page. The Internet consists of millions of web pages, with more being added every day.

Viewing a web page requires a browser, like Internet Explorer, Edge, Safari, Firefox, or Chrome. For example, you are reading this web page using a browser. Once in a browser, you can open a web page by entering the URL in the address bar. For example, typing "<https://www.computerhope.com/esd.htm>" (or copying and pasting) opens the Computer Hope ESD page. If you don't know the URL of the site you'd like to visit, you can use a search engine to find it.

The first web page was created at CERN by Tim Berners-Lee on August 6, 1991. You can visit and browse the first website and the first web page at the info.cern.ch address.

A website refers to a central location containing more than one web page. For example, Computer Hope is considered a website, which includes thousands of different web pages, including this web page you are reading now.

WEBPAGE LARGE

In the example URL above, the web page is “url.htm” and is always the last part of the URL. For URLs not having an ending of .htm, .html, .php, .cgi, .pl, or another file extension, the server loads the default index.htm web page in that directory. For example, on our contact page URL (<https://www.computerhope.com/contact/>), there is no web page. In this case, the default index file loads from the contact/ directory. The most common file format and file extension of a web page is .html, as mentioned above. Most web pages are eventually displayed as an HTML file. In the case of this static web page, the file extension is “.htm,” which is the same as a “.html” page.

Pages that are generated by server-side scripts may have the extension of the programming language used to create that script. For example, a common server-side script extension you may see is .php for a page generated in PHP. Pages generated using PHP and often have a dynamic element such as pulling information from a database to create the resulting HTML page you are viewing in your browser. Keep in mind that the file extension is .php, but the file format is HTML.

Below are other file extensions and file formats you may encounter when developing a web page or browsing the Internet.

As a user surfing the Internet, if you wanted to find a web page on the Internet you'd use a search engine.

For the computer using a browser to find a web page on the Internet it must know the IP address of the web server containing the web page. For example, when you enter a domain name such as computerhope.com, that domain name must be translated by DNS (Domain Name System) into the IP address of the

NEWS PAPER

Newspapers are an important part of our life. Some people cannot start their day without reading newspapers. They are printed in various languages and even in local languages. Newspapers are delivered to our doorsteps every morning. Newspapers are one of the easiest methods of spreading news and information around the world. There might be those who read every single news article, irrespective of what they speak about. There are also people who read only what interests them. For some, it might be politics; for some, it might be sports; while for others, it might be technology. Though the number of people subscribing to printed newspapers is reducing day by day, there are still some who prefer reading them rather than the digital versions of the news on their personal phones or laptops.

Due to the severe scarcity and cost of paper, print media has pushed people to switch to reading digital news. The internet's presence has made things easier. We can learn about the state of the planet simply by pressing a button. We may need to know and understand weather conditions a number of times. Previously, newspapers would bring this to us. We may now check the news on our gadgets to learn about current

ITACHI UCHIHA

Itachi Uchiha, Uchiha Itachi) is a character in the Naruto manga and anime series created by Masashi Kishimoto. Itachi is the older brother of Sasuke Uchiha, and is responsible for killing all the members of their clan, sparing only Sasuke. He appears working as a terrorist from the organisation Akatsuki and serves as Sasuke's greatest enemy. During the second part of the manga, Itachi becomes involved in attacks to ninjas possessing tailed-beast creatures until facing Sasuke in a one-on-one battle. Although Itachi perishes during the final duel, it is later revealed that Itachi had a secret reason for assassinating the Uchiha clan. Itachi is a playable character in most of the video games from the series.

Itachi's character has been popular with readers of the manga,[6] and has been positively received by critics. His appearance as an antagonist has been praised by several writers, although some have considered his initial appearance to be unsurprising. The
